

Sleep Assessment

16 questions. About 5 minutes. Your baseline before the protocol - and the number you'll compare after roughly 4 weeks of consistent practice.

Answer based on **the past 2 to 4 weeks** - the pattern, not one rough night. Circle the points that fit best. First instinct is fine.

SECTION A - THE CLOCK

The Clock

How stable is your timing system?

1 How much does your wake-up time vary across the week?

- ☐ 0 Within 30 minutes - roughly the same time every day
- ☐ 1 30 to 60 minutes variation
- ☐ 2 1 to 2 hours variation
- ☐ 3 More than 2 hours (e.g. 8 AM weekdays, noon weekends)

2 Do you get at least 10 minutes of bright light (outdoors or by a window) within 30 minutes of waking?

- ☐ 0 Yes, most days
- ☐ 1 Sometimes
- ☐ 2 Rarely - I go straight to my desk or screen
- ☐ 3 Almost never - I work in a dim room all morning

3 How consistent is your energy in the first 2 hours after waking?

- ☐ 0 Consistently good - I can focus and work
- ☐ 1 Varies - some mornings fine, others foggy for no clear reason
- ☐ 2 Usually foggy - takes me 1 to 2 hours to boot up
- ☐ 3 Most mornings are a write-off - real work starts late morning or afternoon

4 On a free day with no obligations, what time do you naturally wake up?

- 0** ☐ Within 1 hour of my weekday wake time
- 1** ☐ 1 to 2 hours later
- 2** ☐ 2 to 3 hours later
- 3** ☐ 3+ hours later

5 Do you feel alert and tired at roughly the same times each day, or does it shift unpredictably?

- 0** ☐ Pretty consistent - I know when my energy peaks and dips
- 1** ☐ Somewhat consistent, with occasional off days
- 2** ☐ Unpredictable - good days and bad days seem random
- 3** ☐ Completely chaotic - I never know what kind of day I will get

SECTION B - THE BATTERY

The Battery

How well is your recovery system charging?

6 How long does it usually take you to fall asleep after lights out?

- 0** ☐ Less than 15 minutes
- 1** ☐ 15 to 30 minutes
- 2** ☐ 30 to 60 minutes
- 3** ☐ More than 60 minutes

7 How much caffeine do you have, and when is your last cup?

- 0** ☐ None, or 1 to 2 cups before noon
- 1** ☐ 2 to 3 cups, last one before 2 PM
- 2** ☐ 3 to 4 cups, or last one between 2 and 5 PM
- 3** ☐ 4+ cups, or caffeine after 5 PM (including energy drinks, pre-workout)

8 Do you get a strong energy crash in the afternoon (the 2 PM wall)?

- ☐ 0 Rarely or never
- ☐ 1 Occasionally - once or twice a week
- ☐ 2 Most days - a clear dip around 2 to 4 PM
- ☐ 3 Every day - by mid-afternoon I am basically useless

9 How many hours are you actually in bed per night (getting in to getting out)?

- ☐ 0 7 to 8 hours
- ☐ 1 8 to 9 hours
- ☐ 2 9 to 10 hours
- ☐ 3 More than 10 hours (including lying awake, scrolling)

10 When you wake up in the morning, how rested do you feel?

- ☐ 0 Refreshed - ready to start the day
- ☐ 1 Okay - not great, not terrible
- ☐ 2 Tired - like I barely slept, even after enough time in bed
- ☐ 3 Exhausted - some mornings I want to go back to sleep within an hour

SECTION C - THE OFF-SWITCH

The Off-Switch

Can your brain actually shut down?

11 When you get into bed, does your mind start racing about work, tasks, or problems?

- ☐ 0 Rarely - I can relax and drift off
- ☐ 1 Sometimes - depends on the day
- ☐ 2 Often - I lie there planning, reviewing, worrying
- ☐ 3 Almost every night - a full board meeting the moment I lie down

12 Do you wake up during the night?

- ☐ 0 Rarely or never
- ☐ 1 Once, and I fall back asleep quickly
- ☐ 2 2 to 3 times, sometimes slow to fall back asleep
- ☐ 3 Frequently - awake 30+ minutes in the middle of the night

13 Do you use screens (phone, laptop, tablet) in bed or within 30 minutes of trying to sleep?

- ☐ 0 No - I stop screens at least 30 minutes before bed
- ☐ 1 Occasionally - maybe a quick check
- ☐ 2 Most nights - I scroll or watch something in bed
- ☐ 3 Every night - I fall asleep with my phone or laptop

14 Do you work from your bedroom, or use your bed for non-sleep activities (work, calls, eating)?

- ☐ 0 No - my bed is for sleep only
- ☐ 1 Occasionally
- ☐ 2 Regularly - I sometimes work from bed, or my desk is in the bedroom
- ☐ 3 Always - my bed is my office

15 When you think about bedtime, what is your dominant feeling?

- ☐ 0 Neutral or slightly positive - bed means rest
- ☐ 1 Indifferent
- ☐ 2 Mildly anxious - I hope I can sleep tonight
- ☐ 3 Dread or frustration - here we go again

16 Rate your overall daytime energy over the past 2 to 4 weeks.

- ☐ 0 8 to 10 - good, consistent energy most days
- ☐ 1 6 to 7 - decent but drops noticeably in the afternoon
- ☐ 2 4 to 5 - low, surviving on caffeine and willpower
- ☐ 3 1 to 3 - running on empty, brain fog most of the day

Your Score

SYSTEM	QUESTIONS	YOUR SCORE	MAX
A - The Clock	Q1 to Q5	_____	15
B - The Battery	Q6 to Q10	_____	15
C - The Off-Switch	Q11 to Q16	_____	18
Total		_____	48

What your total means

- 0 - 8** Your system is mostly working. Fine-tuning will sharpen what is already there.
- 9 - 18** Moderate disruption. One or two systems need attention. This course will make a noticeable difference.
- 19 - 30** Significant disruption. Multiple systems are out of sync. This is exactly what the protocol is built to fix.
- 31 - 48** Major disruption. Your systems have been off for a while. The protocol works here too - it just means your starting point is lower, so the improvements will feel more dramatic.

What each system score means (per section)

- 0 - 3** This system is functioning. We will keep it that way.
- 4 - 7** This system needs calibration. Expect improvement during its week.
- 8 - 11** This system is significantly off. This will be one of your biggest areas of change.
- 12+** This system is deeply disrupted. It gets priority attention during its week.

What to do with your score

1. **Write down your total and each section score.** This is your Day 0 baseline.
2. **Note which section scored highest.** That is your most disrupted system. The course fixes them in order - Clock, then Battery, then Off-Switch - but knowing your weak spot tells you which week will feel like the biggest shift.
3. **Start your Sleep Diary tonight.** This assessment is a snapshot. The diary gives you the daily data.
4. **Retake this on Day 28.** The comparison shows you exactly what changed - by data, not by feeling.
