

# Sleep Diary

Fill in the morning from memory. Rough estimates are fine - precision adds anxiety, not data. Print one copy per week.

WEEK \_\_\_\_\_ DATES: \_\_\_\_\_

|                                                                                           | MON | TUE | WED | THU | FRI | SAT | SUN | AVG |
|-------------------------------------------------------------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|
| EVENING CONTEXT (FILL BEFORE BED OR NEXT MORNING)                                         |     |     |     |     |     |     |     |     |
| Daytime nap?<br><small>if yes, how many minutes</small>                                   |     |     |     |     |     |     |     |     |
| Exercise?<br><small>type + time (e.g. "run 6pm")</small>                                  |     |     |     |     |     |     |     |     |
| Last caffeine at<br><small>time of last coffee/tea/energy drink</small>                   |     |     |     |     |     |     |     |     |
| Alcohol?<br><small>what + how much (or "none")</small>                                    |     |     |     |     |     |     |     |     |
| Sleep aid?<br><small>melatonin, magnesium, etc. + dose</small>                            |     |     |     |     |     |     |     |     |
| SLEEP DATA (FILL EACH MORNING FROM MEMORY)                                                |     |     |     |     |     |     |     |     |
| Got into bed<br><small>time you physically got in bed</small>                             |     |     |     |     |     |     |     |     |
| Lights off / tried to sleep<br><small>time you closed eyes to sleep</small>               |     |     |     |     |     |     |     |     |
| Time to fall asleep<br><small>estimated minutes</small>                                   |     |     |     |     |     |     |     |     |
| Night wakings<br><small>count your tally marks</small>                                    |     |     |     |     |     |     |     |     |
| Total awake at night<br><small>estimated total minutes awake</small>                      |     |     |     |     |     |     |     |     |
| Final wake-up time<br><small>time you woke up for good</small>                            |     |     |     |     |     |     |     |     |
| Got out of bed<br><small>time you actually left bed</small>                               |     |     |     |     |     |     |     |     |
| Total sleep (your estimate)<br><small>how long you feel you actually slept (h:mm)</small> |     |     |     |     |     |     |     |     |
| RATINGS                                                                                   |     |     |     |     |     |     |     |     |
| Sleep quality<br><small>1 (very poor) to 5 (very good)</small>                            |     |     |     |     |     |     |     |     |
| CALCULATED (DO AT END OF WEEK)                                                            |     |     |     |     |     |     |     |     |
| Time in bed<br><small>"got in bed" to "got out of bed"</small>                            |     |     |     |     |     |     |     |     |
| Sleep Efficiency %<br><small>sleep time / time in bed x 100</small>                       |     |     |     |     |     |     |     |     |
| Notes<br><small>anything unusual (stress, travel, illness)</small>                        |     |     |     |     |     |     |     |     |

**Sleep Efficiency**= total sleep / time in bed x 100. Target**85%+**(most start 65-75%). 85%+ for 5+ nights = move bedtime 15 min earlier.
